## **Service Update**

From Your Laboratory Service Provider, PathGroup Labs

### **Report Format Update**

Samuel Smith, MD Lab Director / Jeff Johnson, Clinical Operations Manager

*PathGroup Labs is pleased to announce that effective September 7, 2010 our new Clinical Reporting Format will be immediately available to all clients. This release is the combined effort of Clinical Operations and IT Development teams to bring our reporting more in line with industry standards and in response to enhancement requests from many of our clients.*

*Instead of two columns, labeled "Normal" and "Abnormal" there is only one column labeled "Result". Reference ranges still appear on the report. Any result not matching the reference range still appears in bold. Our new format is easier to read and interpret, with improved alignment of results in a single column.*

**For further questions, please contact Client Services at 615-562-9300 or 1-888-474-5227.**
