

PATHCONNECT APPLICATION ENHANCEMENTS/UPDATES

Pranil K. Chandra, DO, Lab Director
Jeff Johnson, AVP of Operations

EFFECTIVE JULY 1, 2013

PathGroup is pleased to release enhancements to the barcoding of labels from the PathConnect application. This development will provide PathGroup with the ability to barcode specimens in your office, while associating specified testing to predetermined tube selections. These changes will improve efficiencies in clinical lab operations.

PathGroup strives to provide industry leading technology; enhancements to the PathConnect application will further our commitment to excellence in patient care and ensure that we have superior specimen collection tracking processes in place.

Beginning the **week of June 10, 2013 and continuing through the month of June**, PathGroup territory account managers will be reaching out to you to provide training and review of these system changes. Step-by-step instructions detailing these changes will be provided. These instructions can be accessed by visiting our website, www.pathgroup.com, and reviewing the technical bulletins in the physician resources section. For a direct link to the document, you will need to type the following URL into your browser: <http://www.pathgroup.com/wp-content/uploads/2013/05/PathConnect-Specimen-Labeling-Project-Final.pdf>. A direct link will also be included on the PathConnect message board and can be copied and pasted into a web browser.

Should you have any questions, please contact your Territory Account Manager, Phlebotomy Supervisor, or submit a request to TrackIt (help@pathgroup.com).
